Professional Summary

Self-taught full-stack web developer with 1 year of experience building responsive, user-focused applications using modern front-end and back-end technologies. Passionate about solving real problems through clean UI design, scalable back-end logic, and strong attention to usability. Adept at building complete applications using JavaScript, Node, Express, and PostgreSQL.

Projects

Blog App (Node.js, Express, JavaScript, EJS, PostgreSQL) - Built a niche blogging platform where users can post thoughts based on specific interests and communities. Implemented secure user authentication and dynamic server-rendered pages using EJS. Designed and managed relational data using PostgreSQL to support fast CRUD operations. Increased user engagement with an intuitive UI tailored to niche groups.

Rapid Movers – Single Page UI Concept (JavaScript, Bootstrap, CSS) - Developed a responsive single-page layout to demonstrate how simple UI components increase clarity and ease of navigation. Solved clutter-based usability issues by implementing a minimalist component-based Bootstrap layout. Improved responsiveness and readability across devices for smoother user decision-making.

SparkMatch – Engagement Landing Page (JavaScript, Bootstrap) - Created a UI layout showcasing how strategic page structure increases user interaction and retention. Integrated Bootstrap utilities for visual hierarchy, spacing, and simplified navigation. Demonstrated increased engagement through intuitive component placement that reduces visual friction.

Technical Skills

Front-End: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), React.js, JQuery, EJS, Responsive Design, UI/UX Principles
Back-End: Node.js, Express.js, PostgreSQL, PHP, REST APIs, Authentication, CRUD Applications

Developer Tools

VS Code, Git & GitHub, Figma, Chrome/Edge DevTools, NPM, Postman

Education

Self-Taught Web Developer – Online Courses, Documentation, Independent Projects
